MICRODERMABRASION

Microdermabrasion of Reviderm is a gentle and effective yet intensive peeling with deep action. The outer layer of the skin is removed very gently. Clinical studies prove that with Microdermabrasion the skin will become more finely pored, the firmness of the skin actually increases, the depth of wrinkles is reduced and the skin’s own collagen and elastin are stimulated.

LIFTING TREATMENTS

All of our lifting treatments are based on state-of-the-art anti-aging research. We use only the most effective treatments in our program. You will be amazed by the results!

MESOLIFTING

Earlier methods for Mesolifting required needles to inject ingredients into the skin. However, we use a modern, Nobel Prize-winning electroporation process, not painful needles. In our process, your skin becomes fuller and smooth from within, with a youthful result that looks significantly firmer and fresher.

Mesolifting approx. 90 min. 150.–

Cleansing, Microdermabrasion, mineral-enzyme peeling, steaming, deep cleansing, Cleopatra-acid, Meso-cocktail, small massage, final care treatment.

Mesolifting approx. 60 min. 100.–

HEAT LIFTING

For visibly loose or sagging cheeks or a tired look around the eyes, a heat lift is the best treatment. Using high frequency radio waves, the deeper layers of the skin are heated, causing the underlying tissue to contract. The result of this so-called „shrinking „, is an immediately visible tightening of the connective tissue from the inside out .

An extra, positive result of this process is the stimulation of new collagen, which lasts a long time, giving the heat lift an excellent, long-term effect.

Heat Lifting approx. 90 min. 150.–

Cleansing, Microdermabrasion, mineral-enzyme peeling, steaming, deep cleansing, Radiofrequency treatment with tightening ingredients, Hyaluronic-Acid skin supply.

CHAMPAGNE TREATMENT

Immediate skin tightening by applying Champagne essences. For centuries, the ancient Egyptians, Greeks and Romans already knew that bunches of grapes and fine wines can be keys to an everlasting youthful appearance. Historic studies and modern analysis have demonstrated that more than 1,000 elements and other useful substances such as vitamins, minerals, polyphenols and fruit acids derived from grapes and wine essences offer an extremely regenerating skin effect that results in immediate skin tightening. Our unique „Champagne Treatment“ rejuvenates and tightens the appearance of the skin. Yes, Champagne is a true fountain of youth – and the source of a more youthful appearance.

Cleansing, Microdermabrasion, special peeling, steaming, deep cleansing, wine-acid, special ingredient concentrates, champagne-massage, champagne-tightening mask, final care treatment.

HYALURONIC-ACID LIFTING

Wrinkle filling with Hyaluronic-Acid without the use of a needle may sound unbelievable! But it is true! We offer cross-linked Hyaluronic-Acid treatment, which we infuse into the skin without using needles. For this intensive moisture treatment, the skin is first prepared with a cold laser. The Mesoporation treatment then gently transfers the Hyaluronic-Acid deep into the skin and thus fills the deposits. This treatment is ideal after long sunbathing or if you sit a lot in heated rooms.

PHYTO-CELL ARGAN

This treatment contains the living essence of herbal stem cells of Argan „sprouts,“ which are cultured from cells of the very rare Argania spinosa, one of the world’s oldest tree species whose origins in a tiny region of Morocco have been traced to the era when dinosaurs walked on the earth. Cultured Argan sprouts are a primary, active cosmetic ingredient of this treatment, which activates the living stem cells of the Dermis layer of skin. The metabolism of the skin is stimulated and a self-renewal process of the skin is generated. The skin is rejuvenated, resulting in natural cell regeneration that renews the skin’s texture, resilience and firmness. Let the wondrous, natural „miracle“ of rare Argan tree stem cells enhance your appearance and beauty. You will be inspired – and so will everyone else!

REGENERATION TREATMENT FOR SCARS

Fine needles therapy by Dr. Gerny

This treatment is ideal for the flattening of raised or unsightly scars and to visibly renew and strengthen scarred skin. Tiny, micro-needle pricks, which are barely felt or noticeable, stimulate the renewal of the surface tissue of the skin. Depending upon the unique needs of each client and the extent of the scarring, special healing and cell-stimulating concentrates are sometimes fed to help nourish the skin. In order to achieve an optimal effect, this treatment is offered as a cure.

RED VEINS CAN DISAPPEAR

In more clinical terms, these small, red veins are called „Telangiectasia.“ They are the smallest blood vessels with no known function. Causes for their occurrence include lengthy sun exposures, improper cleansing of impurities, extreme exposure to cold and other skin irritants. When these red veins occur, the surrounding skin often appears patchy. For both health and appearance, it is wise to treat this condition promptly. We treat red veins with the IPL-system and are able to achieve consistently wonderful results. The unsightly red veins disappear under our pulsed light treatment and healthy skin cells are renewed, regenerating the entire complexion and enhancing the overall appearance of the treated areas.
